Description

**Turnitin** is a web application for comparing text in a student assignment against a number of databases. It has a number of advantages:

- Prevents plagiarism by matching student submissions against collections of academic works in databases.
- Empowers academics to address contract cheating and verify authorship of submitted assignments.
- Enables markers to provide grade and feedback on submitted assignment without leaving the web interface.

**Turnitin** integrates with various Learning Management System via **Learning Tools Interoperability® (LTI®)**.
Getting started

At UNSW, the Teaching Gateway has provided a thorough step-by-step instruction here.

Making Grading Easier and More Consistent

Lynn Gribble

How would you ensure a team of tutors to mark consistently and to the same standard across a large cohort 450 – 1500 students? Lynn Gribble is using GradeMark (in the Turnitin suite) to meet these requirements.
