RECORDING WITH A MOBILE DEVICE

Please fill in this request form if you require video editing services and one of the PVCE media team will be in contact.

Using a mobile device for shooting home videos has become very common but there are some techniques that can enhance your videos when teaching a subject and giving instruction.

VIDEO TUTORIALS:
- How To Shoot Better Video With Your Phone
- Shooting Video with an iPhone
- How to Make YouTube Videos on Your Phone START to FINISH!

READINGS:
- A Beginner’s Guide to Taking Great Video on Your Phone
- Filming on a Mobile Device - University of Derby

App:
- Filmic Pro $22.99

Quite an advanced app for those wishing to take their filming to the next level. It allows for complete control over your camera’s focus, exposure, frame rates, and more.

TIPS:
- Hold horizontally for landscape screen recording
- Try using a tripod or steady surface
- Position subject using the rule of thirds
- Stay close to the subject to ensure decent audio
- Afford using the zoom feature
- Ensure your subject has light on them

Check out the mediaUcreate Moodle course for more information.
